# Flying flames

You will need

- Printed flames - print on card, or double sided paper. Ink can make the paper soft.
- A straw. We used paper straws, but plastic might be better in this activity (paper might go soggy after a few attempts!)
- Sellotape
- Small strip of paper to make the launch cap.

Instructions

- Colour in a flame and trim to edge

- Loosely roll a strip of paper around a straw, and seal with sellotape in the middle, and at the top. This is the launch cap, a bit similar to a pen lid. It should not be too tight. (You could also make this with a slightly bigger straw)

- Sellotape the launch cap to flame

- Put the straw into the launch cap and blow - the flame should fly up into the air!
